WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Hat section: from 2 mm galvanized strip 84 mm wide, folded to two 22 mm flanges, two 45 degree sides and a 16 mm wide top, 16 mm high overall. Fold in a sheet folder; cut lengths with a grinder.

Paint the cut ends with zinc paint; file all edges smooth.

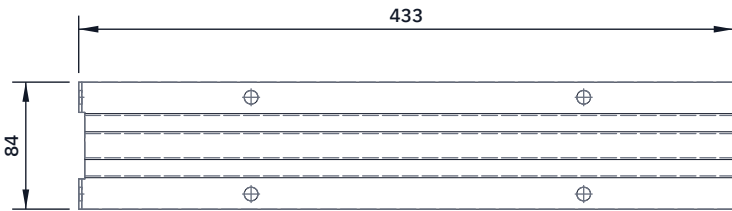

Cut 455 mm of hat section. At one end cut away the top and sides for 26 mm, leaving the two flanges; fold the flanges down 90 degrees 22 mm from their ends to make the tabs (429 mm raised).

Four 9 mm holes in the flanges, 32 mm from the centre line, 110 and 330 mm from the curb end; a 9 mm hole in each tab, 11 mm down.

Grind a 45 degree bevel on the flange edges so it is not a trip edge.

Fit: across the sidewalk from the curb edge to 1 mm short of the riser guard; four M8 anchors, security nuts; tabs share the curb cover's upper anchors. Paint it yellow or fit hazard tape.

Check: no edge stands more than 2 mm off the sidewalk.
