P1	Making sketch for the prototype build plan	2026-10-01	AC

WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Hat section: from 2 mm galvanized strip 84 mm wide, folded to two 22 mm flanges, two 45 degree sides and a 16 mm wide top, 16 mm high overall. Fold in a sheet folder; cut lengths with a grinder.

Paint the cut ends with zinc paint; file all edges smooth.

Length 166 mm of hat section. Cut both flanges off the top 16 mm (only the raised part rises above the sidewalk).

Cut a 20 x 16 mm notch in the raised face at the bottom end for the cable coming out of the gutter cover.

Four 9 mm holes in the flanges, 32 mm from the centre line, 18 and 139 mm up from the bottom end.

Fit: flanges flat on the curb face, standing on the road; four M8 masonry anchors through it and the tabs of the other two covers.

Check: the top of the raised part is 16 mm above the sidewalk.
